

Interested in Research?

The Office of Medical Student Research (OMSR) Lunch and Learn Series presents opportunities for Medical Students to hear from directly from faculty mentors.

September 16 @ 2:30 PM

Haley O'Brien, Ph.D.

Assistant Professor of Anatomy and Cell Biology

Dr. O'Brien uses digital rendering techniques to study the function, physiology, and evolution of cranio-cervical systems. Her primary foci are neuroanatomy and cranial vascular anatomy.

October 19 at 12:00 PM

Daniel Barta, Ph.D.

Assistant Professor Anatomy and Cell Biology

Dr. Barta studies vertebrate growth, development, and intraspecific variation through the application of bone histology, computed tomography, and phylogenetic methods. He focuses primarily on the anatomy of dinosaurs (including birds), and other vertebrates from the Triassic and Permian periods. He is also interested in amniote eggs and nesting.

November 16th at 12:00 PM

Anna Mazur, Ph.D.

Clinical Assistant Professor of Psychiatry

Dr. Anna Mazur is a Board-Certified Neuropsychologist who works with individuals with history of concussion, brain trauma, stroke, neurological, and developmental disorders. She is active in research, with interest in post-traumatic stress and symptoms.

All Lunch & Learns presented on Zoom.

Look for RSVPs on OSU-COM and CHS social media pages prior to event.

Recorded lectures will be uploaded to OSU-CHS YouTube page under the OMSR Playlist

Office of Medical Student Faculty:

Matt Vassar, PhD. Director. Micah Hartwell, PhD. and Tvli Jacob, PhD.
