The I-PASS Mnemonic

I Illness Severity
Stable, “Watcher,” Unstable

P Patient Summary
Summary statement; events leading up to admission; hospital course; plan

A Action List
To do list; timeline and ownership

S Situation Awareness & Contingency Planning
Know what’s going on; plan for what might happen

S Synthesis by Receiver
Receiver summarizes what was heard, asks questions; restates key action/to do items

I = Illness Severity

- Why is it important to classify?
  - Focus attention appropriately
  - Use standard language
- A continuum

A = Action List

- To do list
- Includes specific elements
  - Timeline
  - Level of priority
  - Clearly-assigned responsibility
  - Indication of completion
- Needs to be up-to-date
- If no action items anticipated, clearly specify “nothing to do”

P = Patient Summary

- Describes succinctly
  - Reason for admission (summary statement)
  - Events leading up to admission
  - Hospital course
  - Ongoing Assessment
  - Plan for hospitalization
- Is concise, utilizes semantic qualifiers, focuses on active issues

S = Situational Awareness and Contingency Planning

- Draws receiver's attention to
  - Worrisome patients
  - Potential problems
- Ensures accepting team is prepared to anticipate and respond to changes in patient status
- Promotes a shared mental model

S = Situation Awareness and Contingency Planning

- Identify concerns
- Articulate what might go wrong
- Define the plan
  - List interventions that have/have not worked
  - Identify resources for assistance
- For stable patients: “I don’t anticipate anything will go wrong.”

S = Synthesis by Receiver

- Brief re-statement of essential information in a cogent summary
  - Demonstrates information is received and understood
- Opportunity for receiver to
  - Clarify elements of handoff
  - Have an active role in handoff process
